Multiple methods of instruction are employed.</li> </ul>
<b>Program Description (written by Provider)</b>  <p><b>Attention Tech</b> creates an individualized plan of action for each child tutored. We receive feedback from the AIMS, our own Lexia Reading assessment, and the classroom teacher to build a plan that is specific to each student in order to improve test scores.</p> <p><b>ATLC</b> will use whatever curriculum that supports the school to help each child: computer based, workbook, manipulative, textbook. Curriculum may be <i>McGraw Hill</i>, <i>Glencoe</i>, <i>Lexia</i>, <i>Taylor Reading Plus</i>, and programs that improve organizational and study skills.</p>	
<b>Evidence of Effectiveness (written by Provider)</b>  <p><b>Attention Tech Learning Center (ATLC)</b> deliberately works one on one or in small groups of three. As a result, 85% to 95% of student's tutored in our program make significant improvement. Students who fail to improve during our tutoring sessions tend to have educational needs that can only be addressed by their school.</p> <p><b>ATLC</b> has been working with underperforming students as a tutoring company for five years. Our experience prior to <b>ATLC</b> was operating schools who largely served students with learning disabilities or learning gaps.</p>
